»» SHORT DESCRIPTION OF THE PROJECT

Happy Patient is the Health Alliance for Prudent Prescription and Yield of Antibiotics from a Patient-Centered Perspective which proposes the implementation of a multifaceted intervention to change practice behavior and patients' perceptions about antibiotic use and AMR.

It means the project will include HCPs working in general practice, OOH services, dentists, nursing homes and community pharmacies. This will be implemented in 5 Target Countries (Spain, France, Lithuania, Poland and Greece) with diverse health systems, incomes and level of antimicrobial medicines consumption.

»» WHY IS IT IMPORTANT?

It aims to reduce the impact of AMR by decreasing the inappropriate use of antimicrobials for the management of common community-acquired infections in Europe. AMR is a growing problem threatening societal development and human health.

Funded by
the European Union
